Summary

Unity game developer experienced in building and publishing complete titles, specializing in gameplay systems, physics, and player experience. Strong background in rapid prototyping through game jams, enabling fast iteration from concept to playable builds. Proven ability to learn large existing codebases, ship production-ready PC and mobile games, and present projects at public conventions and academic venues.

Projects

Road-safety Mobile Game (Metrocycle 2.0)

Aug 2024 — Jul 2025

Team of 3 | Undergraduate Thesis Project, Unity 3D, C#, Android, GitHub

- Collaborated with 2 teammates to expand Metrocycle, a motorcycle road-safety game originally built for web.
- Defined development goals by identifying gaps and pain points through research and brainstorming.
- Took ownership of a large existing Unity codebase and learned its architecture independently, refactoring core systems for scalability and maintainability.
- Led the Android porting effort, restoring broken systems and optimizing performance for mobile devices.
- Engineered a centralized localization system supporting multi-language educational content.
- Implemented gameplay systems including weather particle effects, avatar customization, and a modular minigame framework.
- Contributed UI/UX improvements for accessibility and clarity, improving player comprehension of road-safety mechanics.
- Co-managed development workflow, documentation, and version control practices within the team.
- Presented the project at the Workshop on Computation: Theory and Practice 2025 in Hokkaido, Japan for publishing.

Endless Runner Puzzle Game (involuntary: Odd-One-Out)

Apr 2025 — Jun 2025

Google Play Store, itch.io, Ad Integration, Unity 3D, C#, Android

- Designed and developed an endless word-puzzle-based runner game from concept to release.
- Integrated monetization systems using IronSource and Unity Ads, configuring rewarded, banner, and interstitial ad flows.
- Conducted closed beta testing with 10+ external testers and iterated on gameplay balance and UX feedback.
- Handled the end-to-end mobile release pipeline, including playtesting and Google Play Store deployment.

Narrative-driven Adventure Game (Life as a Marites)

Jan 2025 — Jun 2025

Team of 2 | Game Design Document, itch.io, TextMeshPro, Unity Version Control, Unity 3D, C#, Windows

- Built a 3D narrative-driven adventure game inspired by Filipino "Marites" or gossiping culture.
- Programmed all gameplay systems including dialogue flow, branching choices, scoring logic, and text presentation systems.
- Implemented UI and interaction systems using TextMeshPro for dynamic dialogue rendering.
- Coordinated with a designer to structure branching narratives and player decision consequences
- Actively maintained a Game Design Document (GDD) containing concept arts, game mechanics, narrative structure, and timelines to ensure alignment between development and design vision.

Time-Manipulation Puzzle Platformer (heavenly hatdogs)

Apr 2022 — May 2022

itch.io, Game Jam, Unity 3D, C#, Windows/Mac

- Developed a 3D time-manipulation puzzle platformer focused on physics-based gameplay.
- Implemented a custom player controller handling gravity, slope movement, grounded states, and double jump mechanics.
- Iterated the project from a short game jam prototype into a polished convention-ready demo.
- Showcased and presented at the game and anime convention ConQuest 2023, engaging directly with players and gathering usability feedback important for later iterations of the game.

Skills

- **Programming Languages:** C#, C, Python, TypeScript, JavaScript
- **Game Development:** Unity 3D, Gameplay Programming, Physics Systems, Mobile Optimization, Software Architecture, Windows/Mac & Android Platform Builds, Game Design Documentats, Software Documentations
- **Development Practices:** Version Control (Git, GitHub, Unity Version Control / PlasticSCM), Agile, Documentation, Debugging
- **Publishing & Monetization:** Google Play Store, itch.io, Ad Integration (IronSource, Unity Ads)
- **Soft Skills:** Flexibility, Effective Communication, Continuous Improvement, Receptive to Feedback, Problem-solving

Education

Bachelor of Science in Computer Science

Aug 2022 — Jul 2026

University of the Philippines Diliman

- GWA: 1.68 (Cum Laude equivalent)
- Department of Science & Technology (DOST) Merit Scholar
