

Cedric Legara — Software Engineer | Full-Stack Development

legara.connect@gmail.com | [+639192432123](tel:+639192432123) | [github:shankencedric](https://github.com/shankencedric) | [linkedin:shankencedric](https://linkedin.com/in/shankencedric)

Summary

BS Computer Science graduate from the University of the Philippines Diliman with a strong track record of architecting full-stack web and mobile applications using React, Next.js, TypeScript, Node.js, and SQL databases. Experienced in building dynamic QR-based tools, user dashboards, real-time API integrations, and scalable relational database schemas while delivering clean, maintainable code. Proven ability to rapidly master new technologies on-demand, lead technical workflows in agile teams, and translate product requirements into intuitive user interfaces.

Experience

Full-Stack Developer Intern (UP FLCD éLaan)

Jul 2024 — Aug 2024

Team of 5 | Client-based Internship, Agile, GitHub, SvelteKit, Supabase, PostgreSQL

- Initiated and executed a freelance-style internship with a university department to digitize its booking workflow.
- Led the agile development process, facilitating sprint planning, task allocation, and regular client check-ins.
- Architected and implemented the core backend system, starting from a normalized PostgreSQL relational database schema.
- Developed dynamic, multi-step multi-role reservation forms using server actions, implementing strict server-side validation to ensure clean data entry before database insertion.
- Implemented role-based booking flows and data handling to support multiple user types and administrative dashboards.
- Rapidly learned and applied Svelte, SvelteKit, and PostgreSQL to deliver a production-ready system within tight timelines.

Selected Projects

QR-based Class Attendance Software (RollCall)

Sep 2023 — Jun 2024

Team of 5 | Full-Stack Mobile App, Agile Development, GitHub, Supabase, Ionic React, PostgreSQL

- Developed a full-stack application that automates classroom attendance using QR code scanning and dynamic session validation.
- Implemented backend services using Supabase and PostgreSQL to manage auth, real-time attendance records, and course data.
- Designed normalized relational database schemas and access rules to guarantee data integrity and prevent duplicate logs.
- Integrated frontend Ionic React components with backend services to deliver real-time attendance validation feedback.
- Worked in an agile environment with weekly sprints, client standups, and iterative UX improvements based on user feedback.

Virtual Workspace with AI Transcription (SyncSpace)

May 2026

Team of 4 | Technical Lead, Next.js, TypeScript, React, Supabase, PostgreSQL, Vercel, Railway, GitHub

- Conceptualized, led, and co-developed a virtualized spatial office platform integrated with automated AI meeting transcriptions.
- Stepped up as acting technical lead, directing sprint goals, technical documentation, and cross-functional task alignment.
- Architected the system's ERD and implemented the Supabase backend infrastructure, handling relational database design, user authentication, and Google OAuth integration.
- Developed custom Supabase backend functions and modular REST endpoint logic to bridge frontend UI states with real-time data.
- Owned the multi-platform deployment topology, configuring CI/CD pipelines on Vercel for the frontend and orchestrating independent backend microservices on Railway.

Web Wrapper with Widgets for iOS & CarPlay (LiveLyrics)

Aug 2026 — Present

Sole Developer | React Native, TypeScript, Swift, Objective-C, WidgetKit, REST APIs, GitHub

- Directed AI-assisted development tools to rapidly prototype, debug, and ship an end-to-end music application within 2 weeks.
- Architected an web wrapper app delivering real-time synced lyrics across iOS Home Screen, Lock Screen, and CarPlay widgets.
- Orchestrated React Native to WidgetKit IPC using Swift and Objective-C bridges to shared UserDefaults data structures.
- Designed real-time DOM lyrics scraping, LRC parsing algorithms, and background playback pipelines.
- Managed Expo prebuild workflows, target entitlement capabilities, and physical iOS deployment documentation.

Skills

- **Programming Languages:** TypeScript, JavaScript, Python, C, C#
- **Frontend Development:** Next.js, React (Ionic React, React Native), Svelte, SvelteKit, HTML5, CSS3
- **Backend & Databases:** Node.js, Supabase, PostgreSQL, MySQL, Playwright, Authentication, REST & RPC API Integration
- **Cloud & Infrastructure:** Vercel, Railway, Git, GitHub, VS Code, Figma, Agile Methodology, Software Documentation, Debugging

Education

Bachelor of Science in Computer Science

Aug 2022 — Jul 2026

University of the Philippines Diliman

- GWA: 1.68 (Cum Laude equivalent) | Department of Science & Technology (DOST) Merit Scholar
