Summary

Gameplay and software developer experienced in building and shipping PC, mobile, and web-based interactive applications. Specializes in gameplay systems, physics, technical architecture, and rapid prototyping using Unity and C#. Proven ability to take ownership of existing codebases, refactor scalable systems, collaborate across teams, and deliver production-ready projects presented at public conventions and academic venues.

Projects

Road-safety Mobile Game (Metrocycle 2.0)

Aug 2024 — Jul 2025

Team of 3 | Published (the academe, itch.io), Thesis, Unity 3D, C#, Android, GitHub

- Expanded Metrocycle, a web-based motorcycle road-safety game, into a production-ready Android educational application.
- Refactored and extended a large existing Unity codebase, improving scalability, maintainability, and feature extensibility.
- Led Android porting and mobile optimization efforts, restoring broken systems and improving usability across devices.
- Engineered a centralized localization system supporting multilingual educational content and scalable UI integration.
- Implemented modular gameplay systems including weather effects, avatar customization, and reusable minigame frameworks.
- Redesigned UI/UX systems for accessibility, readability, and clearer player feedback during road-safety scenarios.
- Co-managed GitHub workflows, technical documentation, and collaborative development practices within a 3-person team.
- Published and presented the project at the Workshop on Computation: Theory and Practice (WCTP 2025) in Hokkaido, Japan.

Endless Runner Word-Puzzle (involuntary: Odd-One-Out)

Apr 2025 — Jun 2025

Published (Google Play Store, itch.io), Unity 3D, C#, Android, IronSource, Unity Ads

- Designed and developed a mobile endless runner combining word-puzzle mechanics with fast-paced gameplay loops.
- Integrated monetization systems using IronSource and Unity Ads, including rewarded, banner, and interstitial flows.
- Conducted closed beta testing with 10+ external testers, iterating on gameplay balance, UX clarity, and progression pacing.
- Managed the full mobile release pipeline from prototyping and playtesting to Google Play Store deployment.

Narrative-driven Adventure Game (Life as a Marites)

Jan 2025 — Jun 2025

Team of 2 | Published (itch.io), Unity 3D, C#, TextMeshPro, Unity Version Control, Windows

- Built a 3D narrative-driven adventure game inspired by Filipino gossip culture and branching social interactions.
- Implemented gameplay systems including dialogue flow, branching choices, scoring logic, and dynamic text presentation.
- Developed UI and interaction systems using TextMeshPro for responsive dialogue rendering and player feedback.
- Collaborated closely with a designer to structure branching narratives and player decision consequences.
- Maintained a detailed Game Design Document (GDD) covering gameplay systems, narrative structure, timelines, and production.

Time-Manipulation Puzzle Platformer (heavenly hatdogs)

Apr 2022 — May 2022

Published (itch.io), Game Jam, Unity 3D, C#, Windows/Mac

- Developed a 3D time-manipulation puzzle platformer centered around physics-driven gameplay systems.
- Implemented a custom player controller supporting gravity handling, slope movement, grounded states, and double jumping.
- Iterated the project from a short game jam prototype into a polished convention-ready demo build.
- Presented the game at ConQuest 2023, gathering direct player usability feedback for later gameplay improvements.

Skills

- **Programming Languages:** C#, C, Python, TypeScript, JavaScript
- **Game Development:** Unity 2D/3D, Gameplay Programming, Physics Systems, Technical Architecture, Mobile Optimization, UI Systems, Rapid Prototyping, Windows/Mac & Android Builds
- **Development Practices:** Git, GitHub, Unity Version Control (PlasticSCM), Debugging, Documentation, Agile Collaboration, System Refactoring
- **Publishing & Monetization:** Google Play Store Deployment, itch.io Publishing, IronSource, Unity Ads
- **Additional:** Localization Systems, Technical Prototyping, Game Design Documentation, Player Feedback Iteration

Education

Bachelor of Science in Computer Science

Aug 2022 — Jul 2026

University of the Philippines Diliman

- GWA: 1.68 (Cum Laude equivalent)
- Department of Science & Technology (DOST) Merit Scholar
